

GCP – How and why?

Event with presentations & panel discussion

What is Good Clinical Practice (GCP)? Why is it needed? What are the most important aspects? What is the GCP environment in different areas in Switzerland? Is there a need for GCP in veterinary medicine?

Date October 22nd, 2025
Time 12:20 – 17:15
Location University of Zurich Irchel, Y24-G-55
Registration

If you would like to get general information about GCP...
If you are interested in the regulatory framework of GCP studies...
If you want to know what challenges can arise in GCP studies...
If you are wondering what GCP options are available in Switzerland...
If you are interested in performing veterinary clinical studies...

... join our workshop and get first-hand information from experts in the fields!

Presentations:

“Good Clinical Practice – Requirements, Challenges and Solutions in Academic Research”

Dr. Regina Grossmann, Clinical Trials Center, University Hospital Zurich

“Engineering of therapeutic cartilage grafts”

Prof. Dr. Andrea Barbero, University & University Hospital Basel

“Challenges in the clinical translation of engineered cartilage”

Anke Wixmerten, University & University Hospital Basel

“Translational navigation to innovative therapies for Musculoskeletal Medicine & Plastic Surgery”

Prof. Dr. Lee Ann Laurent-Applegate, University Hospital Lausanne

“Development of veterinary medicines with a focus on veterinary clinical trials”

Dr. Klaus Hellmann, Klifovet GmbH (Argenta), Munich, Germany
