

ATTENTION Young Scientists

Guest lecture

Prof. Gottfried Schatz

Prof. Gottfried Schatz is a biochemist and known through his research on the biogenesis of mitochondria, where he discovered together with others mitochondrial DNA. Numerous publications and international prizes document his successful professional career. After retirement he surprises once more as a philosophical columnist and author of books that make the scientific journey exciting while giving science an attractive «humane» face....

If you are a young scientist take the opportunity to meet Prof. Schatz after his lecture during the apéritif and don't miss his advice on....

«WHAT IT TAKES TO SUCCEED AS A SCIENTIST»
